

## SPECIFICATION AND PERFORMANCE

Series	220	File	220 SERIES_SPEC_1	Date	2024/11/21
--------	-----	------	-------------------	------	------------

## Scope:

This specification covers the requirements for product performance, test methods and quality assurance provisions of **220 SERIES** 

## **Performance and Descriptions:**

The product is designed to meet the electrical, mechanical and environmental performance requirements specification. Unless otherwise specified, all tests are performed at ambient environmental conditions.

## **RoHS:**

All material in according with the RoHS environment related substances list controlled.

MATERIALS			
D. PART NAME DESCRIPTION			
Housing	High Temperature Thermoplastic, UL94V-0, Black		
Contact	Copper Alloy, Gold under Nickel plating		
Shell	Brass, Nickel plated		
Nut	Brass, Nickel plated		
O-RING	Rubber		
EPOXY	EF400 A&B		
	Housing Contact Shell Nut O-RING		

RATING		
Rated voltage	Refer to the product drawing	
Rated current	Refer to the product drawing	
Operating temperature	-20°C to +85°C	
Storage temperature	-20°C to +85°C	
Durability	100 cycles	

ELECTRICAL			
Item Requirement		Test Condition	
Temperature rise test	30°C max. change allowed at rated current	Sample mated, to measure the current when the temperature rise of the terminal within 30°C	
Dielectric withstanding voltage	No Breakdown on appearance	IEC 60512, Test 4a Standard atmospheric conditions Test voltage 500V

Contact resistance	20mΩ max.	IEC 60512, Test 2a Standard atmospheric conditions
Insulation resistance	100MΩ min.	IEC 60512, Test 3a, Method A Standard atmospheric conditions Test voltage 500V±15VDC

MECHANICAL			
Item Requirement Test Condition			
Durability	100cycles no evidence of physical damage.	IEC 60512, Test 9a Standard atmospheric conditions Max. speed of operations = 10 mm/s	
	Contact resistance $20m\Omega$ max	Rest: 30 s, unmated	

ENVIRONMENTAL			
Item	Requirement	Test Condition	
IP degree of protection	IP67	The leak testing is an alternative test to the standard physical IP Code test . The testing process is made through the air leakage equipment, utilizing the difference sizes of molecules between the air and water, the test result can determine whether the products meet the waterproof or dust-proof standard or not. Test pressure: 13kPa Test duration: 10 second No significant change in pressure < 50 Pa	
Thermal shock	Finish Contact resistance $20m\Omega$ max Insulation resistance $100M\Omega$ min	Sample condition: mated $-55^{\circ}C$ $-55^{\circ}C$ $-30$ min. A 30 min. As a cycle, total 5 cycles.	
Humidity test (Steady state)	Finish Contact resistance $20m\Omega$ max Insulation resistance $100M\Omega$ min	Temperature: 40°C Humidity: 90% R.H. Duration: 96hours	

The information contained herein is exclusive property of. Do not copy and print except that Attend accepts. 本文件係屬立威科技股份有限公司所有;非經同意·不得以任何覆寫、拷貝、翻印等方式私自據有。亦不得擅加毀損、塗改。

Humidity cycling test	Finish Contact resistance $20m\Omega$ max Insulation resistance $100M\Omega$ min	Sample condition: mated 65°C RH - RH	
Salt spray	Finish Contact resistance 20mΩ max No damage	Sample condition: mated Temperature: 35°C Salt solution concentration: 5% (by weight) pH value(avg.): 6.5~7.2 spray volume(avg.): 1.0~2.0ml/hour duration: 48hours	

SOL	DER	ABI	LITY
-----	-----	-----	------

Item	Requirement	Test Condition	
Solder ability	95% of immersed area must show no voids, pin holes.	DIP solder tails into the molten solder (held at $230\pm5^{\circ}$ C) up to 0.5mm from the tip of tails for $3\pm0.5$ seconds.
